

WM-FX495

SERVICE MANUAL

Ver. 1.2 2005.12

US Model
AEP Model

Model Name Using Similar Mechanism	NEW
MD Mechanism Type	MF-WMFX495-147

SPECIFICATIONS

- **Frequency range**
FM : 87.5 - 108 MHz
AM: 530 - 1 710 kHz (North, America)
531 - 1 602 kHz (Other countries)
- **Output**
Headphones (🎧) jack Load impedance 8 - 300 Ω
- **Power requirements**
1.5V DC, battery R6 (size AA) x 1
- **Dimensions (w/h/d)**
Approx. 81.1 x 111.2 x 29.3 mm ($3\frac{1}{4}$ x $4\frac{1}{2}$ x $1\frac{3}{16}$ in.), excl. projecting parts and controls
- **Mass**
Approx. 137 g (4.9 oz) (main unit only)
- **Supplied accessories**
Stereo headphones or earphones with remote control (1)
Carrying case or Carrying pouch or Hand strap (1)

Design and specifications are subject to change without notice.

Battery life* (approximate hours)

	Sony alkaline LR6 (SG)**	Sony R6P (SR)
Tape playback	35	9
Radio reception	40	14

* Measured value by the standard of JEITA (Japan Electronics and Information Technology Industries Association).
(Using a Sony HF series cassette tape)

**When using a Sony LR6(SG) "STAMINA" alkaline dry battery (produced in Japan).

Note

- The battery life may be shorter depending on the operating condition, the surrounding temperature and battery type.

Flexible Circuit Board Repairing

- Keep the temperature of the soldering iron around 270°C during repairing.
- Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
- Be careful not to apply force on the conductor when soldering or unsoldering.

Notes on chip component replacement

- Never reuse a disconnected chip component.
- Notice that the minus side of a tantalum capacitor may be damaged by heat.

SECTION 1 SERVICING NOTES

This set detects the rotation of the idler gear (A) (side S) using the photo reflector (PH751). The PH751 is mounted on the MAIN board, therefore the idler gear (A) (side S) cannot be detected with the MAIN board removed. As a result, the motor (M601) cannot be controlled, causing malfunction.

Further, the MD CONT switch (S601) is also mounted on the MAIN board, and with the board removed, the mechanism position cannot be detected and the operation is not changed over.

Therefore, when the voltage check is executed with the MAIN board removed, follow the procedure provided below.

1. Setting

- 1) Refer to "3. DISASSEMBLY", and remove the MAIN board.
- 2) Connect the MAIN board to the motor (M601) using jumper wires. These can be connected easily with the use of the extension tool (Part No. 1-769-143-11) (ten in one set).
- 3) Connect the AF oscillator to the TP752 and the BT401 (BATT-).
- 4) Supply 1.5 V to the battery terminals using the regulated power supply.

2. Preset state

To set the PLAY, FF, REW modes, the preset state must be set.

- 1) Check that the slider (NRA) and the MD CONT switch (S601) are set to the center position. If not, set the preset state as follow.
- 2) Move the MD CONT switch (S601) to the side, which the slider (NRA) is facing.
- 3) The slider (NRA) will move when the regulated power supply switch is set to OFF once and then set to ON. Move the MD CONT switch (S601) according to this timing and set to the center position.

3. FF, REW modes

- 1) Check that the preset state is set.
- 2) Input the square wave or sine wave to the TP752 and the BT401 (BATT-).
- 3) Press the **[FF]** button or **[REW]** button .

4. PLAY mode

- 1) Check that the preset state is set.
- 2) Input the square wave to the TP752 and the BT401 (BATT-).
- 3) Press the **[▶◀]** button will move the slider (NRA) once towards the side REV and then to the side FWD. Move the MD CONT switch (S601) according to this timing will set the PLAY mode (side FWD). Press the **[▶◀]** button another time for a second and move the MD CONT switch (S601) according to the movement of the slider (NRA) will set the PLAY mode (side REV).

Note 1: If the above fails, perform from preset again.

Note 2: When using headphones, the timing for move the MD CONT switch (S601) can be determined from the beep sound.

– MAIN Board (Component Side) –□

– MAIN Board (Conductor Side) –□

SECTION 2 GENERAL

This section is extracted from instruction manual.

LOCATING THE CONTROLS

–Tape mode–

* There is a tactile dot beside VOL on the main unit to show the direction to turn up the volume.
 ** The button has a tactile dot.

–Radio mode–

* The button has a tactile dot.

SECTION 3 DISASSEMBLY

- The equipment can be removed using the following procedure.

Note : Follow the disassembly procedure in the numerical order given.

3-1. CABINET (FRONT) SUB ASSY

3-2. MAIN BOARD

3-3. MECHANISM DECK

3-4. CASSETTE HOLDER SUB ASSY

- **Use caution when installing the cassette holder assy**□
Install the cassette holder sub ASSY with the spring (lid up) as shown below in the drawing so that it fits into the holes on the cabinet center. Once installed, fit the left and right pieces on.

- Press on the left & right clips from the rear of the cabinet center and remove the boss.

SECTION 4
ADJUSTMENTS

4-1. MECHANICAL ADJUSTMENTS

PRECAUTION

- 1. Clean the following parts with a denatured-alcohol-moistened swab :
 playback head pinch roller
 capstan rubber belt
- 2. Demagnetize the playback head with a head demagnetizer.
Do not use a magnetized screwdriver for the adjustments.
- 3. These measurement and adjustment should be performed with the rated power supply voltage (1.5 V) unless otherwise noted.

Torque Measurement

Mode	Torque meter	Meter reading
FWD	CQ-102C	1.97 – 4.11 mN • m 20 – 42 g • cm (0.28 – 0.58 oz • inch)
FWD back tension		less than 0.19 mN • m less than 2 g • cm (less than 0.027 oz • inch)
REV	CQ-102RC	1.97 – 4.11 mN • m 20 – 42 g • cm (0.28 – 0.58 oz • inch)
REV back tension		less than 0.19 mN • m less than 2 g • cm (less than 0.027 oz • inch)
FF, REW	CQ-201B	more than 5.89 mN • m more than 60 g • cm (more than 0.84 oz • inch)

4-2. ELECTRICAL ADJUSTMENTS

PRECAUTION

- Supplied voltage : 1.5V.
- Switch and control position
VOLUME control (RV301) : maximum
HOLD : OFF

TAPE SECTION

0 dB = 0.775V

Test Tape

Type	Signal	Used for
WS-48A	3kHz, 0dB	Tape Speed Adjustment

Tape Speed Adjustment

Procedure :

- 1. Playback WS-48A (tape center part) in the FWD state and adjust RV601 so that the frequency counter reading becomes 3,000Hz.
Standard value : 2,910–3,090Hz
- 2. Playback WS-48A (tape center part) in the REV state.
Check that frequency counter reading is within ±1.5% (approx.45Hz) of the reading of step 1.

Adjustment Location :

Adjustment Location :

The schematic diagram illustrates the internal circuitry of a portable cassette player, organized into several functional blocks:

- FM/AM Front End (IC1):** This block handles the initial signal processing. It includes an FM RF input, FM/TV oscillator, AM RF input, AM oscillator, and various mixers and detectors. It also features a quad detector and a power switch (SW).
- System Control (IC701):** This IC manages the overall system, including mono/stereo control, IF input, IF count, mode selection (MODE-1, MODE-2), VCO input, radio on/off control, and motor control signals (F/R_CTRL, MOTOR_START, MOTOR_SPEED, MOTOR_BREAK, MOTOR_DIR).
- Pre/Power Amp (IC301):** This block provides the pre-amplification and power amplification for the audio signal. It includes input amplifiers (INA, INB), output amplifiers (OUTA, OUTB, OUTC), and a mute control.
- Capstan/Reel Motor Drive (IC601):** This IC controls the motor drive, including the driver, pre-driver, and control sections. It also includes a motor bleak switch (Q604-606) and a motor speed control (RV601).
- DC/DC Converter (T401, Q405):** This converter steps down the VBAT voltage to a lower level (VREF) for the motor and other components.
- Regulators (IC201, IC801):** These ICs provide regulated power supply rails. IC201 is a +1.6V regulator, and IC801 is a +2.5V switching regulator.
- Other Components:** The circuit includes a liquid crystal display (LCD1), a key matrix (S702-715), a tape speed control (RV601), a motor bleak switch (Q604-606), and various passive components like resistors, capacitors, and inductors.

The diagram uses color-coded arrows to indicate signal paths: red for FM, black for AM, and blue for PB. The components are labeled with their respective values and pin numbers, and the overall circuit is powered by a VBAT source.

5-3. SCHEMATIC DIAGRAM –MAIN SECTION (1/2) – ● See page 15 for Notes.

5-4. SCHEMATIC DIAGRAM –MAIN SECTION (2/2) – ● See page 15 for Notes.

Note on Schematic Diagram

- All capacitors are in μF unless otherwise noted. pF: μF 50 WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in Ω and $\frac{1}{4}\text{W}$ or less unless otherwise specified.
- Δ : internal component.
- $\square$: panel designation.
- — : B+ Line.
- : adjustment for repair.
- Power voltage is dc 1.5V and fed with regulated dc power supply from battery terminal.
- Voltages and waveforms are dc with respect to ground under no-signal (detuned) conditions.
- no mark : FM
- () : AM
- < > : Tape Play
- Voltages are taken with a VOM (Input impedance 10 M Ω). Voltage variations may be noted due to normal production tolerances.
- Waveforms are taken with a oscilloscope. Voltage variations may be noted due to normal production tolerances.
- Circled numbers refer to waveforms.
- Signal path.
- $\Rightarrow$: PB
- $\Rightarrow$: FM
- $\Rightarrow$: AM

• Waveforms**Note on Printed Wiring Board**

- $\circ$ — : parts extracted from the component side.
- $\circ$: Through hole.
- : Pattern from the side which enables seeing.

(The other layers' patterns are not indicated.)

Caution:

Pattern face side: Parts on the pattern face side seen from the pattern face are indicated.
(Side B)

Parts face side: Parts on the parts face side seen from the parts face are indicated.
(Side A)

SECTION 7 ELECTRICAL PARTS LIST

MAIN

NOTE :

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX, -X mean standardized parts, so they may have some difference from the original one.
- RESISTORS
All resistors are in ohms
METAL : Metal-film resistor
METAL OXIDE :Metal oxide-film resistor
F : nonflammable

- Items marked “ * ” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- SEMICONDUCTORS
In each case, u : μ , for example :
uA.... : μ A.... , uPA.... : μ PA....
uPB.... : μ PB.... , uPC.... : μ PC....
uPD.... : μ PD....
- CAPACITORS
uF : μ F
- COILS
uH : μ H

When indicating parts by reference number, please include the board.
